RODRIGO NUNES

I am a highly motivated and dedicated entry-level software developer with a strong passion for **creating impactful software solutions**. I am seeking an **Entry Level Web Developer** position after graduating from the Level 5 Web Design and Development program at Toi Ohomai - Te Pukenga.

With 12 years of experience as a Chef, I bring **unique transferable skills** including working under pressure, creative thinking, design, and problem-solving. Actively seeking opportunities to apply my skills and contribute to an innovative organization that encourages growth and creativity.

Let's connect if you're in need of a motivated and enthusiastic Software Developer!

SKILLS

- JSON file creation using VS Code and Mongo DB Atlas.
- Frontend development with HTML, CSS, and JavaScript, emphasizing responsive design, cross-browser compatibility, and accessibility.
- Designing CRUD applications using PHP and SQL.
- Database design with SQL, MySQL (including tools like c-panel, Microsoft Data Management Studio, Azure Data Studio, VS Code), and Postgre-SQL.
- C# .NET programming with XAML for front-end GUI.
- Reasonable understanding of Object-Oriented Programming (OOP) principles (Encapsulation, Inheritance, Abstraction, Polymorphism) for implementing real-world entities with reusable methods and variables while ensuring security.
- Bilingual proficiency in English and Portuguese.
- Excellent customer service skills with a focus on customer and user experience.

PROJECTS

Project 1 **Web Portfolio**

Ad Developed a web application using JavaScript, HTML, and CSS enhancing user experience with interactive features and seamless navigation.

Project 2 **Mobile App**

Collaborated with a team for an academic project to build a mobile app with C# and XAML, using the .NET framework UWP incorporating a web API and efficient algorithms for best performance.

Project 3 **Currency Converts**

Developed a web application using live currency price update web API.
